COMING SOON: October 27-28, 2021

International Conference of the Association of Eurasian Central Securities Depositories "Reforming Financial Markets: Benefits and Threats"

ZOOM REGISTRATION

A Conference of the Association of Eurasian Central Securities Depositories (AECSD) will be held on October 27-28, 2021. The 17th conference with participation of the leading experts from AECSD and other regions will be held online for the first time.

The AECSD International Conference is an annual event for members of the Association and representatives of the global financial community, which gathers professionals and experts of the depository market on its site.

The event's Program includes two panels and two presentation sessions along with a virtual cultural program, separate halls for small talks both with AECSD members and among all the guests of the Conference.

PROGRAM

Among the issues planned for discussion:

* SWIFT strategy for the securities market
* Pension fund management
* The impact of blockchain technologies on the depository sector
* Digitalization of assets and the role of Central Depositories
* Harmonization of the process of integration of financial markets
* Economic, Social and Corporate Governance (ESG)

And this is not a complete list of issues that will be discussed at the upcoming conference.

See you soon!
National Settlement Depository (NSD), a part of the Moscow Exchange Group, is the central depository of the Russian Federation. It is a key component of the Russian financial infrastructure.

NSD offers a wide range of services to its clients, including depository services, cash and settlement services, OTC transaction registration (repository services), information services, collateral management services, and technological services. NSD settles on-exchange trades and conducts a major part of OTC settlements; it services Russian and foreign securities. NSD services securities issued by companies representing more than 40 countries.

The total value of assets in custody amounted to RUB 69.5 trln. The total value of non-Russian securities in custody at NSD amounted to RUB 8.7 trln. Since the launch of trade reporting, the Trade Repository registered 250 mln contracts with the total value of RUB 3,500 trln. The annual average volume of payments going through the NSD Payment System exceeds RUB 320 trln.

The Central Securities Depository (CSD)

The Central Securities Depository (CSD) is the key infrastructure organization of Kazakhstan's financial market in the area of post-trading services. CSD offers its clients depository, registrar and information services as well as bank account and payment agent services.

CSD development is focused on improving the convenience of client services, expanding the range of products and implementing IT transformation to promote further development of Kazakhstan's stock market. Participation in the global community of post-trading organizations, many years’ client experience and a well established system of interacting with foreign partners ensure strengthening of CSD's positions while integrating with international capital markets.
Description — Percival, founded in 1986, is a software provider for CSDs, Registras and Stock Exchanges. Back then Percival started developing systems for share registration and quickly advanced by 1990 to their first CSD solution implementation project.

Percival has continued to improve and extended their CSD products; as technology advances, Percival takes advantages of the latest trends and tools to re-engineer their product line. DEPEND represents the latest generation of CSD product in this line, and REGARD is the latest product for share registration and transfer agents (RTAs). Recently Percival has extended their product portfolio and developed trading system REVENUE which went live in 2021.
