

Galina Pervova Head of EDI Standardization, Electronic Document Management and Client Applications Unit

NOTIFICATION BY ISO 15022 AND 20022 MESSAGES

ISO 15022 STANDARD CORPORATE ACTIONS-RELATED MESSAGES

MT 564 **Corporate Action Notification** MT 565 **Corporate Action Instruction MT 56X MT 566 Corporate Action Confirmation** MT 567 **Corporate Action Status and Processing Advice MT 568 Corporate Action Narrative**

SPECIFIC ASPECTS OF THE ISO 20022 FORMAT

- A data model specifically designed for the financial services sector Completeness of implementation options for each business process
- Message descriptions do not depend on the message transport system used for data interchange (it is possible to use not only SWIFT, but other message transport systems, too)
- Availability of mechanisms designed for use of external data (dictionaries, specific identification codes, etc.)
- Option to adapt to Russian market specifics for transmission of specific information, using extensions
- Support of data transmission in Russian
- Use of a common syntax for messages in different business domains (payments, securities, investment fund transactions, etc.)
- Use of the messaging standard that is common to global financial markets
- Reduced costs of integration with global financial institutions
- Improvement of fully automated straight-through processing (STP)

ISO 15022 AND ISO 20022 STANDARDS: WHAT IS IN COMMON?

- A Data Dictionary concept
- Message elements (dates, amounts, rates, quantity, flags, etc.)
- A similar message structure (blocks and sub-blocks)
- Common dictionaries and codes
- A message registration system
- Support of version message management

ISO 15022 AND ISO 20022 STANDARDS: DIFFERENCES

- More message types, broken down by business process
- More data fields, in which external data can be used with the help of specific identification codes
- No need to additionally register data fields in which specific identification codes are used
- Option to use Cyrillic characters in messages
- More dictionaries; identification codes broken down by business process
- Option to use extensions to transmit information not provided for by the Standard
- ISO 20022 formats are XML-based, and formats themselves are described with the help of XSD

SPECIFIC ASPECTS OF ISO 15022 MESSAGES

- Separate messages are issued for each securities account of a client and for each security.
- A message indicates the CA Reference assigned to the particular security, along with the general CA Reference assigned to the issuer.
- Russian text is transliterated.

Example:

Two securities participate in the meeting:

ISIN1

ISIN2

The client holds three securities accounts:

Account1

Account2

Account3

The client will receive 6 SWIFT messages:

Account1 / ISIN1

Account2 / ISIN1

Account3 / ISIN1

Account1 / ISIN2

Account2 / ISIN2

Account3 / ISIN2

SPECIFIC ASPECTS OF ISO 20022 MESSAGES

- Separate messages relating to a corporate action are issued for each securities account of a client and for each security.
- Meeting messages include details of all securities participating in the meeting.
- A message indicates the CA Reference assigned to the particular security, along with the general CA Reference assigned to the issuer.

Example:

Two securities participate in the meeting:

ISIN1 ISIN2 The client holds three securities accounts:

Account1

Account2

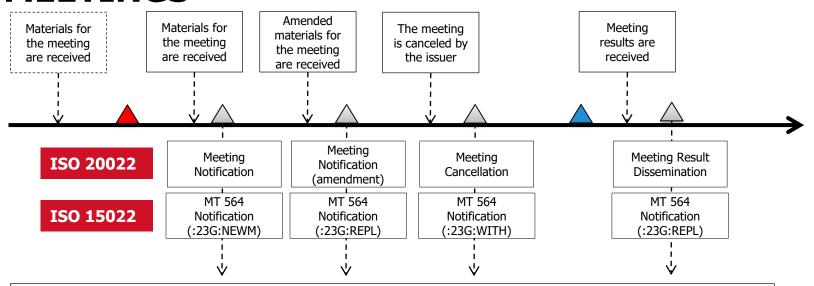

Account3

The client will receive 3 XML messages:

Account1 / ISIN1+ISIN2 Account2 / ISIN1+ISIN2 Account3 / ISIN1+ISIN2

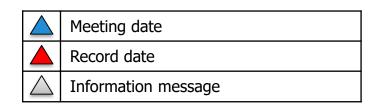

DISSEMINATION FLOWCHART EXAMPLE. MEETINGS

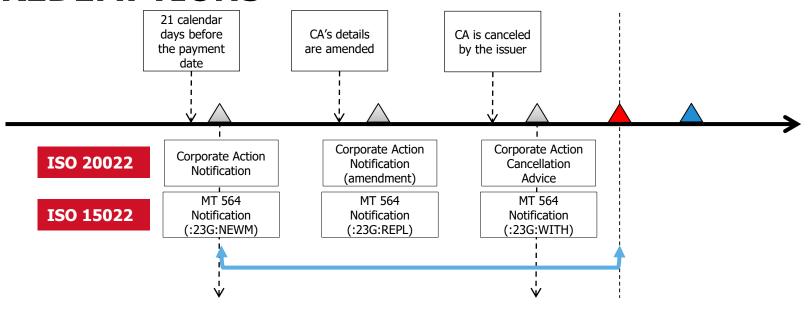

- If materials for the meeting are received before the record date, the relevant message will be sent on the date immediately next to the record date.
- The function of the message "NEWM" is used for the first message for the particular CA, and "REPL" is used for all further messages in the chain.
- In ISO 20022 messages, the 'Amendment' block is used for all messages of that type, excluding the first one.
- For ISO 15022 messages, an additional MT 568 message can be used if the amount of information in the primary MT 564 message exceeds the maximum message length.

DISSEMINATION FLOWCHART EXAMPLE. REDEMPTIONS

- Messages are sent to the clients with securities balances at the time of message dissemination.
- The function of the message "NEWM" is used for the first message for the particular CA, and "REPL" is used for all further messages in the chain.
- In ISO 20022 messages, the 'Amendment' block is used for all messages of that type, excluding the first one.

	Payment date	
	Record date	
\triangle	Information message	
44	Messages are sent to all clients with new securities balances within the indicated period.	

ISO 20022 AT NSD LEI ISSUANCE

NSD is a pre-Local Operating Unit (pre-LOU) authorized by the ROC to issue LEI codes.

ISO 20022 MESSAGE NUMBER AND NAME (ENG)	ISO 20022 MESSAGE NAME (RUS)	MESSAGE NAME IN NSD'S BUSINESS PROCESS
IdentificationVerificationRequest acmt.023.001.02	Запрос на верификацию идентификатора	Identification Verification Request
IdentificationVerificationReport acmt.024.001.02	Отчет о верификации идентификатора	Identification Verification Report

ISO 20022 AT NSD CENTRALIZED UIT UNITS RECORDKEEPING SYSTEM (CUU RKS)

As part of the CUU RKS project, NSD used ISO 20022 messages to interchange the following information with participants:

- Submission/cancellation of an order to subscribe for, redeem, or switch UIT units, including details required to open an account
- Order execution confirmation
- Order/order cancellation status advice
- Instructions to accept securities for safekeeping and/or recordkeeping or to withdraw securities from safekeeping and/or recordkeeping
- Instruction execution notification
- Instruction processing status advice

ISO 20022 AT NSD: BANK ACCOUNT (PAYMENT) SERVICES

Bank account services are services involving cash transfers in a bank account, as well as other services relating to cash transfers (Payments Initiation, Payments Clearing and Settlement, and Cash Management message groups).

To enable participants to exchange advices, ISO 20022 messages of the 'Administration' group are used.

ADDITIONAL ADVANTAGES OF THE ISO 20022 STANDARD IMPLEMENTED AT NSD

- The ISO 20022 data model is used as a canonical model for integration interface between NSD's internal systems.
- XSD Schemas of ISO 20022 messages are used to implement a mechanism of automatic generation of screens for end users of NSD's systems.
- Data received from external counterparties is stored in internal systems' databases in the form of ISO 20022 XML messages.
- The ISO 20022 Standard methodology and repository were used to create new message types for automated data interchange between Russian market participants (e.g., proposals to convene a meeting, proposals of agenda items, and proposal to nominate candidates).

THANK YOU!

DISCLAIMER

- This presentation has been prepared and issued by NSD (the "Company"). Unless otherwise stated, the Company is the source for all data contained in this document. Such data is provided as at the date of this document and is subject to change without notice
- This document does not constitute or form part of, and should not be construed as, an offer or invitation for the sale or subscription of, or a solicitation of any offer to buy or subscribe for, any securities, nor shall it or any part of it or the fact of its distribution form the basis of, or be relied on in connection with, any offer, contract, commitment or investment decision relating thereto, nor does it constitute a recommendation regarding the securities of the Company
- The information in this document has not been independently verified. No representation or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy or completeness of the information or opinions contained herein. None of the Company, or any of its subsidiaries or affiliates or any of such person's directors, officers or employees, advisers or other representatives, accepts any liability whatsoever (whether in negligence or otherwise) arising, directly or indirectly, from the use of this document or otherwise arising in connection therewith
- This presentation includes forward-looking statements. All statements other than statements of historical fact included in this presentation, including, without limitation, those regarding our financial position, business strategy, management plans and objectives for future operations are forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance, achievements or industry results to be materially different from those expressed or implied by these forward-looking statements. These forward-looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we expect to operate in the future. Important factors that could cause our actual results, performance, achievements or industry results to differ materially from those in the forward-looking statements include, among other factors:
 - Perception of market services offered by the Company and its subsidiaries
 - Volatility (a) of the Russian economy and the securities market and (b) sectors with a high level of competition that the Company and its subsidiaries operate
 - Changes in (a) domestic and international legislation and tax regulation and (b) state policies related to financial markets and securities markets
 - Competition increase from new players on the Russian market
 - The ability to keep pace with rapid changes in science and technology environment, including the ability to use advanced features that are popular with the Company's and its subsidiaries' customers
 - The ability to maintain continuity of the process of introduction of new competitive products and services, while keeping the competitiveness
 - The ability to attract new customers on the domestic market and in foreign jurisdictions
 - The ability to increase the offer of products in foreign jurisdictions
- Forward-looking statements speak only as of the date of this presentation and we expressly disclaim any obligation or undertaking to release any update of, or revisions to, any forward-looking statements in this presentation as a result of any change in our expectations or any change in events, conditions or circumstances on which these forward-looking statements are based
